

Collaboration through Integrated Technology

Improved Tools for Libraries, Teachers, and Students

As a Google for Education Partner, Gale uses the most current and popular Google tools to support students as they develop key study and organizational skills. By integrating leading resources in its platforms—such as Google Apps for Education, a free suite of tools that includes Gmail, Classroom, Drive, Docs, and more—Gale supports Media Specialists looking to extend the reach of their resources outside of the library and helps educators improve student engagement, encourage collaboration, and foster critical thinking. Best of all, these innovative features are **available from anywhere and on any device**:

- **Seamless User Login:** Users can log into to their Gale *In Context*, *GVRL*, *Kids InfoBits* or *InfoTrac* resources using their Google Account credentials.
- **Integrated Google tools:** Once logged in, users can easily share and download articles—including their highlights and notes—using Google Apps for Education tools like Drive and Docs.
- **Improved access:** Schools and libraries can provide students with access to their resources via apps available for free download through the Chrome Web Store and Google Play for Education. These product apps will provide an additional way for students to easily access library resources from their tablets and mobile devices.
- **Google Classroom integration:** Teachers and students can seamlessly assign or turn in content from Gale Resources to Google Classroom via Google's new Classroom share button.
